

Brief Bio

Dr. Forest Tan graduated from University of Warwick in UK in 2006 with a PhD in Engineering working on sensor systems to mimic the olfactory system under a postgraduate scholarship from Singapore. He holds a BaSc (Hons) in Computer Engineering from Nanyang Technology University (NTU) Singapore. He started his academic career as a senior tutor at NTU in 2000 and his research mainly focus on sensors and embedded systems where has had a number of funded research projects and numerous publications. He joined Singapore Institute of Technology (SIT) in 2012 and is currently the cluster director for the InfoComm Technology (ICT) cluster where he work closely with faculty to deliver degree programmes in various specializations in ICT. He is very interested in teaching and learning related development and how they can elevate student's learning experience to ensure seamless transition to the IT industry.
